**Subject:** Cell phone; S. Church Fate and Transport paper

Hi everyone,

I have a request. At some point I loaned out my desk copy of Stan Church's study on the fate and transport of metals throughout the Animas watershed. Church, S.E., Kimball, B.A., Fey, D.L., Ferderer, D.A., Yager, T. J., and Vaughn, R.B., 1997. "Source, Transport, and Partitioning of Metals between Water, Colloids, and Bed Sediments of the Animas River, Colorado" in *U.S. Geological Survey Open-File Report 97-151*. This was a soft bound volume, ½ to ¾" thick. I really need to get that back now so please think about it and if you've borrowed it I would appreciate its return.

So that's about it. I am in pretty good health these days and Peter Butler and Steve Fearn have been great to work with, helping with coordinating ARSG efforts. Our meetings are well attended and hopefully we will eventually come up with a solution in Upper Cement Creek that will be employed to significantly reduce the loading from the historic mines in that area. Please continue attending our monthly meetings when you can and let any of us three co-coordinators know what we can do to better serve our collaborations needs.

Sincerely,

Bill Simon
